

The 1930s saw the rise of hand built model racecars, known as spindizzies or tether cars. Miniature racecars built by hobbyists zoomed around banked wooden tracks at speeds approaching 150 miles per hour. Resembling the full-size racers of their day, several spindizzies competed at once, tethered by cables to a central pole. Powered by model airplane engines, spindizzies raced against the clock. Incredibly detailed and aerodynamic, these miniature racecars were beyond toys; they were pieces of art representative of the best pioneering technology of the era. Constructed using original blueprints our Bantam Midget model resembles the original down to the smallest detail. One look and you'll be ready to join the competition.

PC011
Bantam Midget
M. 48 x 22 x 18cm, 19 x 8.75 x 7"

- ◆ solid wood cherry and maple frame, hand finished
- ◆ one of the few spindizzies that featured turning front wheels
- ◆ faux leather seat
- ◆ detailed dash and steering wheel
- ◆ spoke wheels with rubber tires

PC012
Red Bantam Midget
M. 48 x 22 x 18cm, 19 x 8.75 x 7"

PC013R
BB Korn, Red
M. 52.5 x 24.5 x 17.5cm, 20.75 x 9.75 x 7"

- ◆ hand cast airplane aluminum body
- ◆ solid cast aluminum wheel hubs
- ◆ rolling wheels with rubber tires
- ◆ toy racers of the past were made with fixed wheels, as they only ran on straight or circular tracks
- ◆ detailed dash, black anodized steering wheel
- ◆ faux leather racing seat
- ◆ faux engine parts are included
- ◆ detailed dash and steering wheel
- ◆ hand cast aluminum frame
- ◆ rubber tires

PC013
BB Korn
M. 52.5 x 24.5 x 17.5cm, 20.75 x 9.75 x 7"

Technically skilled enthusiasts of the 1930s loved to race the legendary B.B. Korn cars around the club tracks. Called tether cars or spindizzies, they reached incredible speeds, and inspired thousands to improve and invent. The founder of the B.B. Korn Manufacturing Company, Barney Korn, produced several tether car models that now, as vintage antiques, achieve astounding sums at auction.
